Tarea 2: Mapeo Caótico

Guillermina Montanari 9/2/2017

Mapeo Caótico

Considere el siguiente mapeo dependiente del parámetro a de R : [0, 1] \rightarrow [0, 1],

$$f(x) = a * sin(x * \pi)$$

Grafique las series de tiempo de los atractores de punto fijo, periódicos y caóticos del mapeo.

Atractores

Punto Fijo:

1. a [0.1 - 0.3] y x0 = 0.1

Periódico:

2. a
$$[0.4 - 0.5]$$
 y x $0 = 1$

3.
$$a = 0.6 y x0 = 1$$

3. a = 0.7 y x0 = 1

4. a = 0.8 y x0 = 1

Caótico:

5.
$$a = 0.9 y x0 = 1$$

5. b = 1 y x0 = 1; Es esto azar?

Telaraña de atractores

Punto Fijo:

1.
$$$a = 0.3 y x0 = 0.1$$

Periódico o Ciclo:

2.
$$a = 0.8 y x0 = 0.1$$

Caótico:

3.
$$a = 0.9 y x0 = 1$$

Azar:

3.
$$a = 1 y x 0 = 1$$

Diagrama de Bifurcación

5. a [0,1] y x0 = 1
